

“CEPSA Marine Fuels, S.A. delivers Marine Gasoil of 0.1% sulphur content, at all its ports”

CEPSA Marine Fuels, S.A. (CMF), in order to comply with European regulations and to achieve its customers requirements, offers 0.1% sulphur content MGO at all its ports with the last incorporation of the port of Tenerife, in the Canary Islands.

At the beginning of December 2009, CMF has started supplying MGO 0.1% in the port of Tenerife, replacing MGO 0.2% volume. In that area, this product is being supplied already at the port of Las Palmas with a successful demand.

Thanks to Cepsa's refineries at Tenerife, Algeciras and Huelva, CMF is able to guarantee the best quality of this and all products, always adapting to the market demand and international standard regulations.

In order to reach CMF's main objective, its client's satisfaction, CMF constantly works on finding the best formulas combining its musts: reliability, quality, versatility and timely responsiveness. Being ready to supply MGO 0.1% in all its ports one month before the law comes into force, is one more achievement of the CMF's formula.
