

CEPSA LIMPIASALPICADEROS

It is a formulation based on silicones to clean, restore and protect vinyl, synthetic and natural leather etc.

It is especially indicated for cleaning dashboards, vinyl roofs and synthetic leather seats in cars.

Its use is also indicated in motorcycles, boats, caravans, offices and homes.

It protects the treated surfaces and eases subsequent maintenance.

The product is presented in a SPRAY container.

METHOD OF USE

- Spray onto the surface to be treated from 15 to 20 cm distance and rub with a clean dry cloth
- For difficult to reach areas, the product may be sprayed directly onto the cloth.

HEALTH & SAFETY AND ENVIRONMENT

Health, safety and environmental information is provided for this product in the Materials Safety Data Sheet. This gives details of potential hazards, precautions and First Aid measures together with environmental effects and disposal of used products.
