DESCRIPTION

A lubricant based on maximum quality synthetic technology, formulated to comply with the lubrication of the engines, both petrol and diesel, produced by the world’s saloon car manufacturers.

APPLICATIONS

- For all types of petrol and diesel engines, especially multi-valve, turbo-charged and “common rail” direct injection.
- For all types of weather and driving, especially sports, or that considered by manufacturers as “severe conditions”.

PERFORMANCE

- Because of its freezing and fluid point, it is extremely efficient at cold-starting and prevents premature battery wear and can noticeably reduce motor wear due to lack of oil.
- Due to its low volatility, it reduces oil consumption under sports and high speed driving conditions.
- High detergent/dispersant power.
- Because of its high synthetic configuration, it has high resistance to loss of viscosity (shearing) due to the forces to which the dynamic engine components are subjected (bearings, pistons and segments, etc).

SPECIFICATIONS

- API SL/CF
- ACEA A3/B3
- VW 505.00 (level)
- MB 229.1 (level)

HEALTH & SAFETY AND ENVIRONMENT

Health, safety and environmental information is provided for this product in the Materials Safety Data Sheet. This gives details of potential hazards, precautions and First Aid measures together with environmental effects and disposal of used products.
