

Carbon Footprint Report under ISO 14064-1:2012  
Reporting year 2020 Asset Caracara COLOMBIA

## Executive Summary

This report includes GHG inventory related to Production Activity in Caracara Asset (the whole Caracara block), Colombia, during year 2020. GHG emissions correspond to scope 1 and 2 in the facilities.

The inventory has been made in accordance with International Standard ISO-14064-1:2012, under criteria of operational control of the facilities defined in the scope.

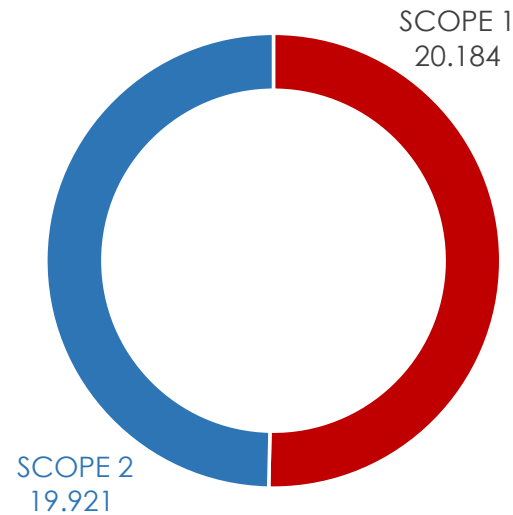

Cepsa's Carbon Strategy lines continue to promote this verification and communication of emissions at the organization level. This inventory includes direct and indirect CO<sub>2</sub> emissions, as well as other gases such as CH<sub>4</sub>, N<sub>2</sub>O and refrigerant gases.

Scope 1 or direct emissions, correspond to **combustion, flaring emissions, mobile sources and fugitive emissions**. We have included in fugitive emissions, GHG from refrigerant refills and transport and distribution of gas in the facilities under the scope.

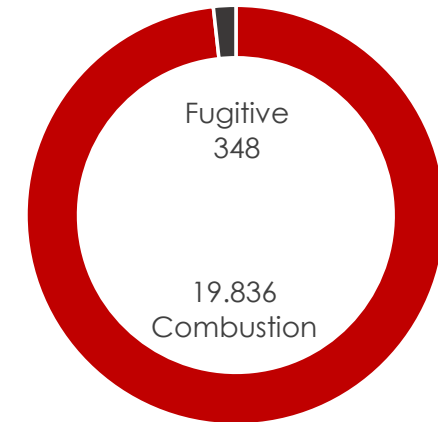

Scope 2 or indirect emissions, correspond to electricity purchase in the facility.

### Total CO<sub>2eq</sub> emissions

Direct Emissions SCOPE 1  
Indirect Emissions SCOPE 2  
Tonnes GHG (CO<sub>2eq</sub>)

Direct Emissions SCOPE 1  
Tonnes GHG (CO<sub>2eq</sub>)

**98%** Combustion emissions CO<sub>2eq</sub>  
**2%** Fugitive emissions CO<sub>2eq</sub>
