

IONITY opens its first ultra-fast power charging facility with Cepsa in Spain

- **The station, located in Pallejà (Barcelona), has four 350 kW High Power Chargers**
- **Significant reduction in charging times for current and future EVs**
- **Cepsa will supply 100% renewable electricity to these facilities**

In conjunction with Cepsa, IONITY has launched its first high-power charging station in Spain. Located in Pallejà (Barcelona), the new site is equipped with 4 high power charging points each with a capacity of 350 kW. These chargers are compatible with the European standard Combined Charging System (CCS) and reduce charging times for current and future EVs significantly.

Offering 1,2 Mega Watt of power for the 4 high power chargers, the IONITY station is among the fastest in Spain. IONITY has prepared the station for 2 additional high-power chargers that can be added depending on the demand. Cepsa will supply 100% renewable energy to these facilities.

This first station in Spain is the latest chapter in the expansion of IONITY's pan-European charging network. The objective is to make long distance EV travel a reality. Pallejà is also one of 340 ultra-fast charging stations being deployed within the Europe-E project, covering main routes across 13 EU Member States and along all 9 TEN-T Core Network Corridors and the Core Network. The EUROPE-E project is co-financed by the Connecting Europe Facility of the European Union.

In July 2018, [Cepsa signed a collaboration agreement with IONITY](#), the European high-performance charging network formed by the BMW Group, Daimler AG, Ford Motor Company, and the Volkswagen Group with Porsche AG, for the installation of electric charging points at its service stations in Spain and Portugal.

Cepsa currently has an extensive network of close to 1,800 service stations in Spain and Portugal. The Cepsa management team is focused on offering a clear model of customer orientation, innovation, added value, safety and loyalty. Cepsa sells top quality fuels at its Service Stations, and also offers many other products and services.

IONITY is based in Munich and was founded in 2017; it is a joint venture of the BMW Group, Daimler AG, Ford Motor Company, and the Volkswagen Group with Porsche AG. The goal of the joint venture is to build an extensive and reliable 350 kW High-Power-Charging network (HPC) for electric vehicles in Europe to make comfortable long- distance EV travel a reality IONITY has attractive national and international locations through its strong partners. IONITY is an internationally

registered trademark.

Cepsa is a global energy company, which operates in an integrated manner throughout the value chain stages of hydrocarbons, in addition to the manufacture of products from raw materials of plant origin, and which has a presence in the renewable energy sector.

It has 90 years of experience and a team of some 10,000 employees, who combine technical excellence with adaptability. It has presence on all five continents through its business areas: Exploration and Production, Refining, Chemicals, Marketing, Gas and Electricity, and Trading.
