

ENVIRONMENTAL DECLARATION 2021

LA RÁBIDA ENERGY PARK

Environmental policies and environmental management

To help achieve our environmental objectives and reinforce our climate commitment, at Cepsa we have developed policies and indicators that allow us to monitor and analyze progress in this area:

- Safety, health, environment and quality policy
- Sustainability Policy
- Climate action policy
- Biodiversity policy

In addition, La Rábida Energy Park (PELR) has an Environmental Policy that complements the previous one and is related to the Good Environmental Practices Agreement signed in 2013 with the Huelva Port Authority.

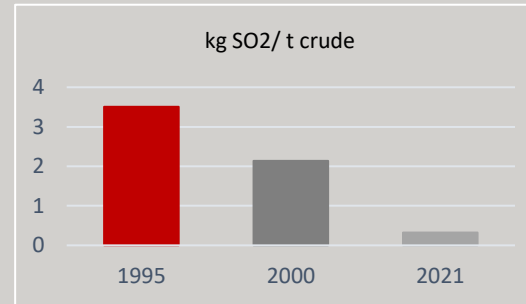

PELR has implemented an Environmental Management System (EMS) certified by AENOR according to UNE-EN-ISO 14001:2015, in order to develop and put into practice the established environmental policy and manage its environmental aspects.

In May 2022, PELR has obtained the validation of its Environmental Declaration, with an EMAS certificate, which it already achieved in 1998, including the same scope of the Environmental Management System in the registry.

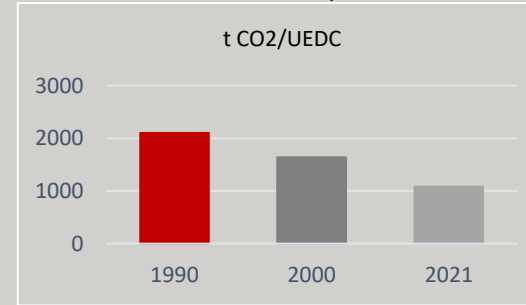

In 2020, the European Commission has congratulated the refinery for its environmental achievements in more than 20 years. We were the first facility in Spain to register in the European register of eco-audited centers according to EMAS, which has earned it the 'Early Birds' distinction.

Air emissions

85% reduction in the ratio SO₂ emissions per ton of crude oil processed between 2000 and 2021.

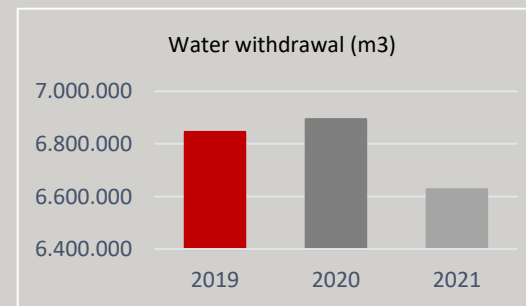

t CO₂/kUEDC* has been reduced by 48,76% since 1990.

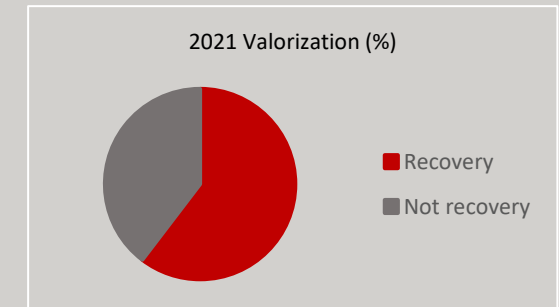

Water withdrawal

In absolute terms, the consumption of water withdrawal has decreased by 3.9%, 100% of which comes from the Guadiana Hydrographic Confederation.

Waste

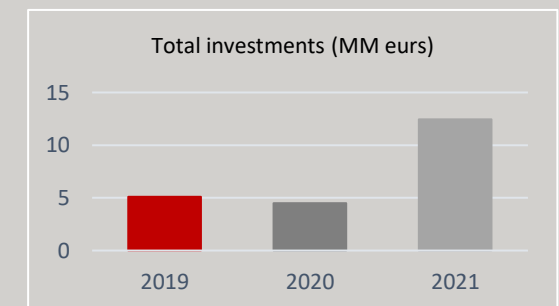

60% of the waste generated was reused and/or recycled in 2021.

Environmental investments

The two most relevant projects in 2021:

- Installation of an electrofilter for emissions from the Fluid Catalytic Cracking Plant (FCC)
- Completing construction of a Vapor Recovery Unit for VOC at the maritime terminal.

(*) UEDC: crude equivalent treated expressed in kbarrels per day
