

Cepsa Renews Quality Certification For San Roque Energy Park Maritime Terminal

- **The Spanish Port Authority gives this recognition to put the spotlight on organizations that voluntarily contribute to improving port services.**
- **The company has renewed this certification for the 11th consecutive year, as a result of its commitment to the sustainability and safety of its operations in the Bay of Algeciras.**

Cepsa has renewed its certification for the San Roque Energy Park (PESR) maritime terminal in accordance with the *Service Quality for Bulk Solid and Liquid Cargo Traffic* standard from the Spanish Port Authority, having successfully completed the annual audit conducted by external verification entity AENOR.

This is a voluntary certificate that validates the quality of maritime concession service provision from various perspectives: adequacy of facilities and infrastructure, resource management, operational safety, merchandise services, including billing and productivity, and customer service. This standard, which has been renewed for 11 consecutive years, validates the quality of port terminal concessionaires and service providers in ports of general interest.

In this annual evaluation, conducted by AENOR with participation by different Cepsa divisions, all activity-related aspects on the dock and the single buoy mooring were address from the point of view of operations, safety and prevention measures, customer service, and facility maintenance, among others.

The head of Cepsa's Maritime Terminals, José Manuel Fernández-Sabugo, emphasizes that "the renewal of this certification only highlights Cepsa's firm commitment to making the company's operations in the Bay of Algeciras sustainable and its firm commitment to continuous improvement and quality of services".

Throughout the year, Cepsa submits the main aspects that govern its activity—safety, sustainability, quality and energy efficiency—to various internal and external audits across its facilities that accredit the excellence of its management and production processes.

NOT

Cepsa is a leading international company committed to sustainable mobility and energy with a solid technical experience after more than 90 years of activity. The company also has a world-leading chemicals business with increasingly sustainable operations.

In 2022, Cepsa presented its new strategic plan for 2030, Positive Motion, which projects its ambition to be a leader in sustainable mobility, biofuels, and green hydrogen in Spain and Portugal, and to become a benchmark in the energy transition. The company places customers at the heart of its business and will work with them to help them advance their decarbonization objectives.

ESG criteria inspire all of Cepsa's actions as it advances toward its net positive objective. Over the course of this decade, it will reduce our Scope 1 and 2 CO₂ emissions by 55% and the carbon intensity index of our products by 15-20%, with the goal of achieving net zero emissions by 2050.
