

San Roque and Palos de la Frontera Energy Parks prepare their open houses

- **The company will offer tours on October 21, 22, 28 and 29 or November 4, 5, 11 and 12 with a total of 600 places**
- **The Open House events, which were suspended due to the Covid19 pandemic, are part of Cepsa's commitment to its local areas and its responsibility to maintaining transparency with the public**

Cepsa will hold its Open Houses at the San Roque and La Rábida Energy Parks on October 21, 22, 28 and 29 and November 4, 5, 11 and 12. To attend, simply register on [this form](#).

Participants will have the opportunity to learn about the facilities, the company's activities in Campo de Gibraltar and Huelva, and the many ways that crude oil is used in daily life that they may not know about, in addition to Cepsa's new strategic plan for 2030, *Positive Motion*.

During these open house events, which last approximately three and a half hours, visitors will receive a welcome talk, visit the industrial facilities, and take a walk through the Madre Vieja Environmental Station or the Laguna Primera de Palos, an example of ecosystem biodiversity and conservation, which was first promoted and developed by Cepsa and now by Fundación Cepsa. They will also witness the high safety, environmental protection, energy efficiency, innovation and quality standards that govern all of Cepsa's activities.

This initiative, which has been in place since 2006 and in which over 5,000 people have taken part so far, is in addition to the various institutional, educational, associational, and technical visits Cepsa carries out annually in order to show itself to the outside world and promote closer ties with the community.

The company will run buses for visitors in order to facilitate journeys from towns in the Campo de Gibraltar and Huelva region.

Cepsa is a leading international company committed to sustainable mobility and energy with a solid technical experience after more than 90 years of activity. The company also has a world-leading chemicals business with increasingly sustainable operations.

In 2022, Cepsa presented its new strategic plan for 2030, Positive Motion, which projects its ambition to be a leader in sustainable mobility, biofuels, and green hydrogen in Spain and Portugal, and to become a benchmark in the energy transition. The company places customers at the heart of its business and will work with them to help them advance their decarbonization objectives.

ESG criteria inspire everything Cepsa does as it advances toward its Net Positive objective. This decade, it will reduce its Scope 1 and 2 CO₂ emissions by 55% and its Scope 3 emissions by 15 to 20%, with the objective of reaching net zero emissions by 2050.
