

BUTANE AND PROPANE GAS

Butane and propane, also called Liquefied Petroleum Gas (LPG), are obtained from crude oilfields and petroleum refining

NEW LIGHTER, SAFER AND MORE MANAGEABLE BOTTLES

WHAT ADVANTAGES DO THEY HAVE?

- **Lighter than traditional bottles** (less than 20kg, with 12.5kg of product)
- **More convenient and easier to handle** thanks to their edgeless design
- **100% compatible** with any butane or propane installation
- **24/7 ordering service**

WHY IS IT SO SAFE?

- 1 Due to its high-resistance **Valve Guard Handle** which protects it from any knocks
- 2 Made from **high-resistance stainless steel** which prevents possible leaks or damage if the bottle suffers an impact
- 3 Its **intelligent chip** improves the filling process, increasing safety

WHAT ENERGY ADVANTAGES DOES CEPSA'S BOTTLED GAS OFFER?

EFFICIENT ENERGY

High caloric power and performance

CLEAN ENERGY

No sulfur residues or microparticles

ECONOMICAL ENERGY

Unbeatable value for money and significant energy savings compared to other energy sources

SAFE ENERGY

Safe and risk-free

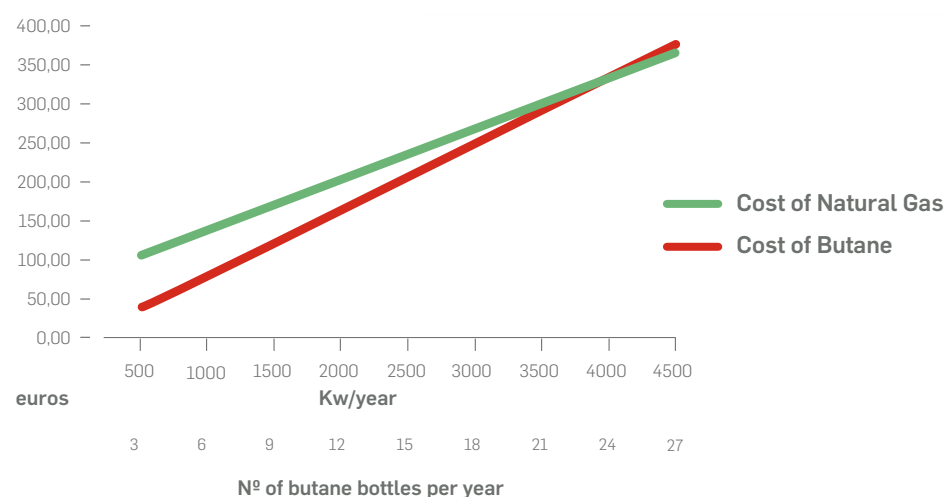

DID YOU KNOW?

- Cepsa sells more than half a million tons of LPG per year
- In Spain more than 60 million bottles are sold each year
- Your daily shower is equivalent to using 5.5 bottles of butane per year*
- Cepsa has over 3,000 points of sale and more than 650 delivery vehicles

* This data depends on the use of appliances which use butane and the age of these appliances

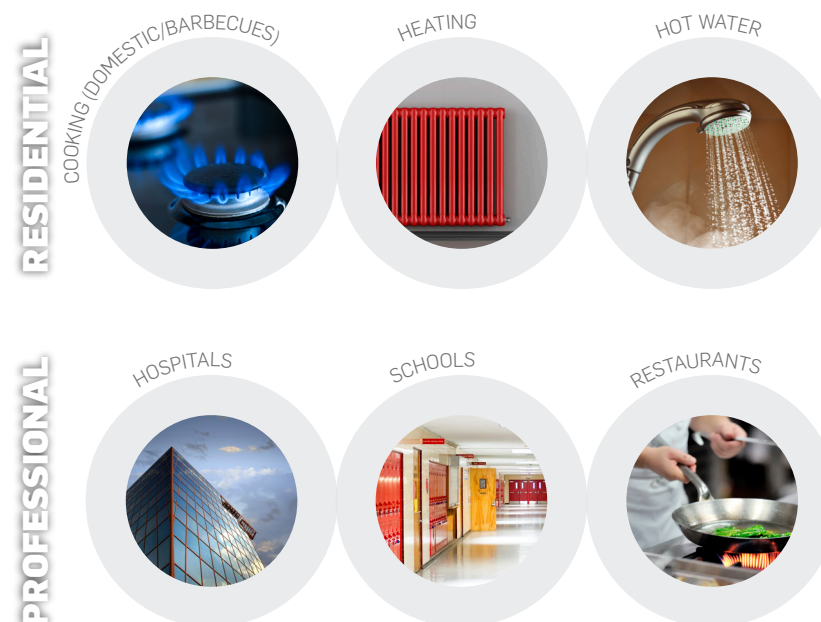

Comparative butane vs natural gas cost**

For low consumption use, butane is more economical

** The fixed-term contract and hire of a natural gas meter are equivalent to 6.4 bottles of butane per year
 ** Prices from Official State Gazette as of September 2015 – Natural gas prices include fixed-term contract and meter hire
